From the NELC

At the Grand Lodge Convention in Duluth, Green Bay Lodge #18 submitted a proposal directing the NELC to petition the USCG about changing Milwaukee Harbor Breakwater Light from a single flashing red light (10 sec) to a group flashing light (FL (2) R 10 sec) to make the light more distinguishable from shore lights.

Immediately after the convention the NELC contacted the USCG, and within just a few days received a positive response. The USCG concurs with the proposal, and they intend to publish the proposed change in the Notice to Mariners for the next eight (8) weeks. If no objections are voiced, the change will be made in mid-May.

--John Sarns, NELC Chairman

Here is the response received from the US Coast Guard:

I have received your request to change the characteristic on Milwaukee Harbor Breakwater Light (LLNR 20635). I concur with your concerns and the change from FL R (2) 20s to FL (2) 10s is not a difficult task. In accordance with our policy we have to advertise the proposed characteristic change in the Local Notice to Mariners for a period of 8 weeks. Unless we receive strong objections, you can expect the change to take place in mid May 2015.
